The event is a collective walk from the source of the Mugnone river (near Fiesole) to its outlet in the Arno. Along the way we will cross rural, periurban and urban landscapes. The route will be divided into stages, in each of which we will meet different activities (water sports, artistic and citizens science's events). Citizens, associations, teachers and university students will be involved. The day will conclude with the signing of the Memorandum of Understanding of the Torrent Mugnone Contract, an act of shared commitment by several public stakeholders interested in the environmental and socio-economic regeneration of the stream.
